

Pilot Prep Worksheet

Everything a business needs to decide before an enquiry assistant answers its customers — whether you work with us or not. Fill it in once (20–30 minutes), and your team has one agreed page of answers, prices, rules and handover contacts. If you run a pilot with Mountain AI, send it back and we set your assistant up from it: it uses only what you approve here.

How the Mountain AI pilot works. 1) Free demo in 24 hours, built only from your public website. 2) 14-day live pilot for a fixed AED 1,500 on your website chat and/or WhatsApp Business number, in English and Arabic — credited in full against the full setup (AED 7,500 + AED 1,250/month) if you continue within 30 days. 3) Each qualified enquiry reaches your staff as a short summary; anything uncertain goes to a person. 4) End-of-pilot report: enquiries handled, out-of-hours enquiries, qualified leads, handovers. We don't promise a number of bookings.

A. Your business basics

Business name (as customers know it)	
Website / price-list link	
Location + Google Maps link	
Opening hours (incl. Friday, weekends, Ramadan if different)	
Areas you serve / deliver to	
Languages for replies	☐ English ☐ Arabic ☐ Other: _____

B. Services and approved prices

List what customers ask about most. If a price depends on the job, write “price on request” — the assistant will never guess a number.

Service	Approved price (AED) or “price on request”	Duration / lead time	Notes (what's included, conditions)

C. Booking, payment and cancellation rules

How is a booking confirmed, and by whom?	
Deposit or advance payment?	
Cancellation / rescheduling notice	
Documents customers must bring or send	
Offers currently approved (with end date)	

D. Your 10 most common questions — and the approved answer

Scroll your WhatsApp chats from the last month: the questions you answer again and again belong here.

#	Customer question	Approved answer

E. What the assistant must never do

Tick the lines you want (all recommended) and add your own.

☐ Confirm a booking	Only your staff confirm; the assistant says when they will reply.
☐ Quote unapproved prices or discounts	Only the prices and offers in sections B and C.
☐ Give medical, legal or financial advice	Collects details and passes them to a person.
☐ Promise results, delivery or approval dates	Says who will confirm and by when.
☐ Your own:	

F. Handover: who receives enquiries

Staff WhatsApp number or email for summaries	
Hours they cover	
Backup person (evenings, weekends, leave)	
What counts as urgent for your business?	e.g. complaint, reaction after treatment, breakdown, same-day booking: _____
Reply promise customers should see	e.g. "Our team confirms within 2 working hours": _____

G. Channel

☐ Website chat	Nothing to register. Who adds one short snippet to your site? _____
☐ WhatsApp	The account stays in your company's name in Meta Business (free). Who has admin access to approve the connection on Meta's own screen? _____ We never ask for passwords.
WhatsApp number	☐ A separate number for the assistant ☐ Keep the current WhatsApp Business app number working alongside it ("coexistence", through an approved Meta provider)

Coexistence switches off disappearing messages, view-once, live location and broadcast lists on that number (Meta's developer documentation). The WhatsApp connection depends on Meta's own checks, so timing varies; website chat can usually start first. Meta WhatsApp message fees are billed to you directly by Meta or your provider.

H. What success looks like after 14 days

Write today's number first, so the end-of-pilot report has something real to compare against. Pick two or three.

Measure	Today (your estimate)	Target for the pilot
Enquiries per week (WhatsApp + website)		
Enquiries arriving outside opening hours		
% answered within 1 hour		
Qualified requests passed to staff		
Your own:		

I. Customer data — the short version

The free demo uses only your public website — no customer data. In a pilot the assistant collects only what's needed to hand an enquiry to your team (clinics: booking details only, no medical records). Your business decides; we process data on your behalf under a written agreement signed before go-live, which names every provider and the storage location. Logs are kept for the service plus 30 days, then deleted or returned to you. Full notice: mountainai-ae.com/privacy.html.

Ready? Send this worksheet (a phone photo is fine) or just your website link. **Free demo within 24 hours**, private link, no obligation.
